Clear Chat

Block User
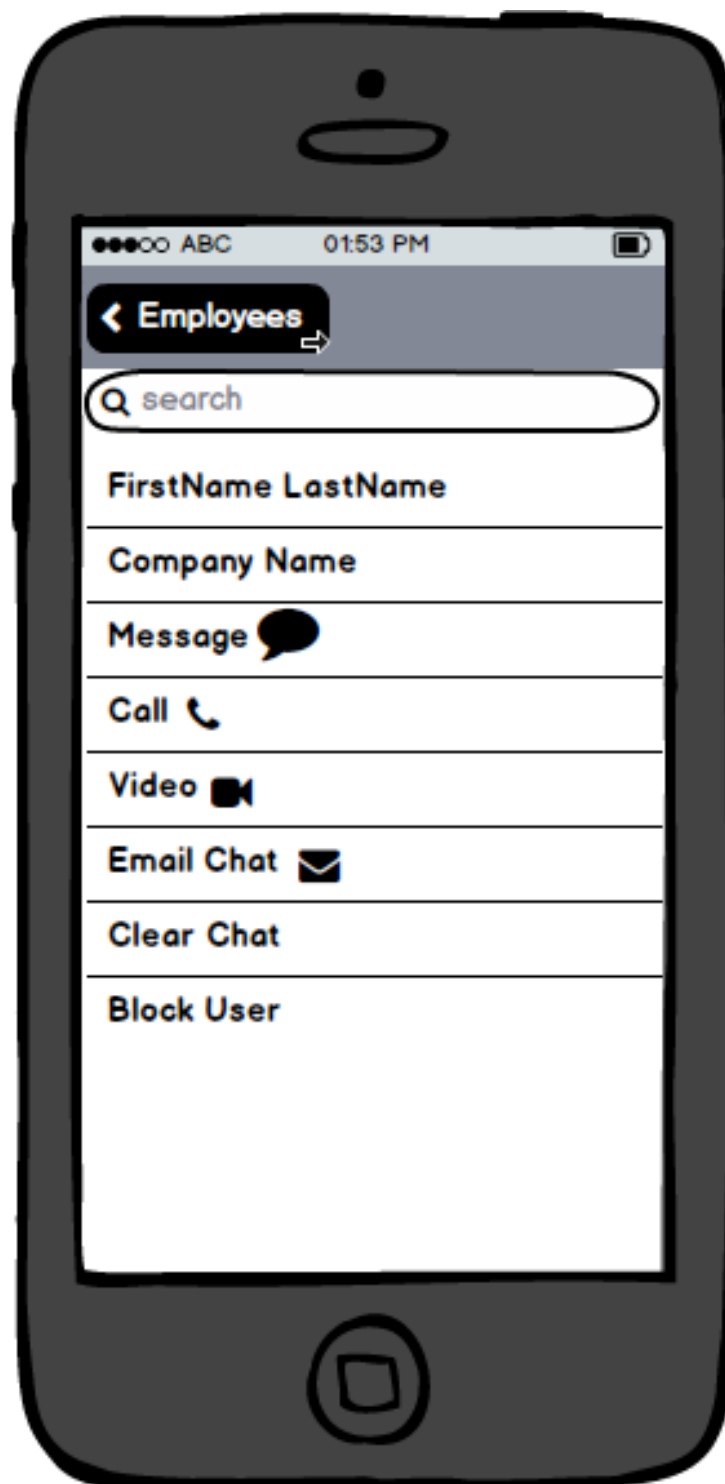

FirstName, LastName, and Company Name fiels are NOT editable. Displays information that the user has stored.

No edit button necessary. Will make it so user has to store all data. Saving a user will store all their info. Similar to facebook, twitter, instagram, etc...you dont have to edit you friends/followers because their info is saved

Block (Bonus Feature) will not allow this user to make any contact with you
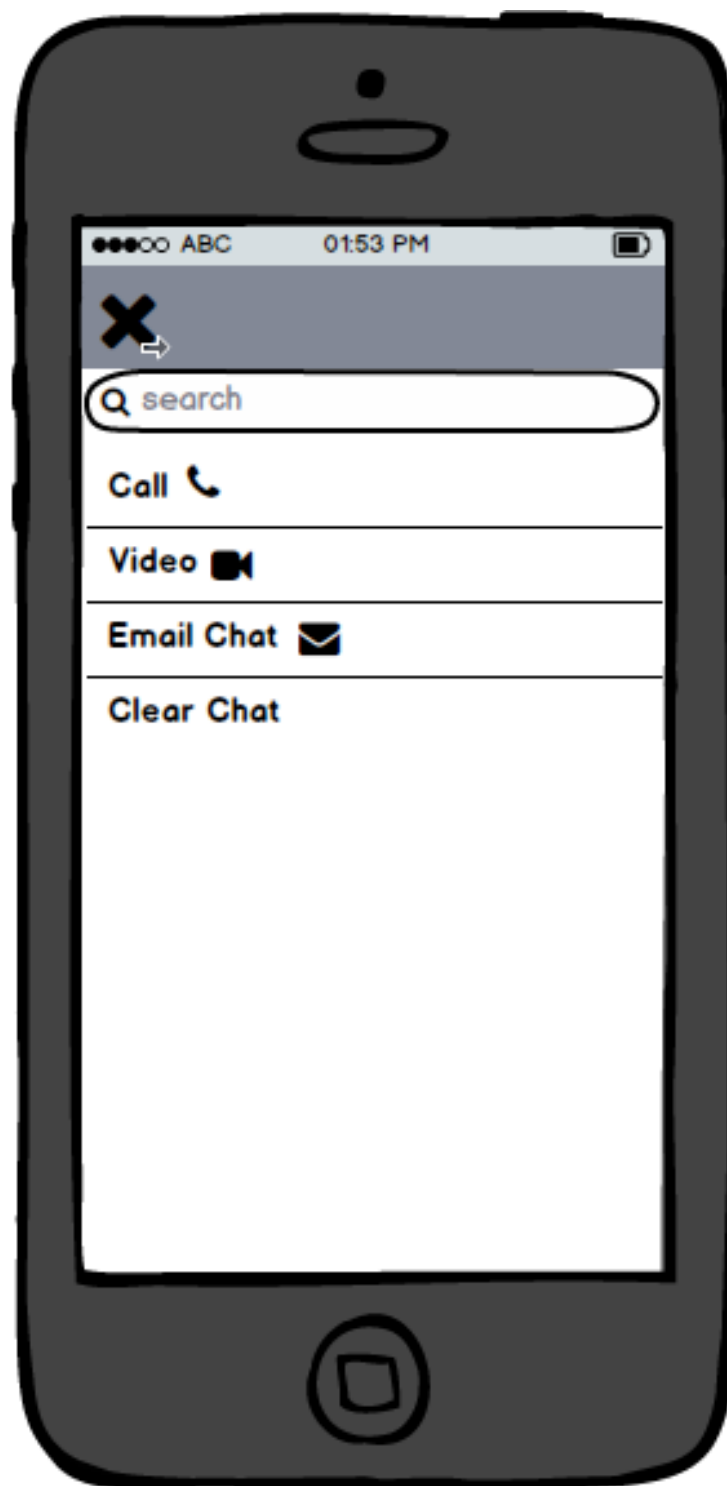

Call: similar to iOS calling

Video: Similar to FaceTime
* ideally (Bonus Feature if we get to it)

Email: Opens up iOS mail app and sends a .txt file of the transcript

Clear Chat: deletes all messages in the given chat session
